# AG SERIES

**ISOLATED, PROPORTIONAL DC TO HV DC CONVERTERS** 

100V to 6000V @ 1.0 and 1.5 Watts

# Extremely Low Profile: 0.128 inches and volume of < 0.100 cubic inches<sup>®</sup>

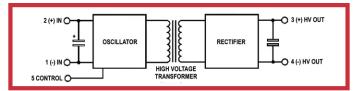

NOW UL RECOGNIZED

Proven Reliability

#### PRODUCT DESCRIPTION

The AG Series is a new line of ultra-miniature DC to HV DC converters that set an industry standard in high voltage miniaturization. These component-sized converters are ideal for applications requiring minimal size and weight. Occupying less than one tenth of a cubic inch of volume<sup>15</sup>, this unique package features an extremely low profile of only 0.128 inches (3.25mm) when mounted in from the top, or 0.152 (3.86mm) when mounted in from the bottom of the PCB! The AG Series converter can also mount off the PCB with .030" diameter pins. See page 9 for illustrations. Controllable output voltages range from 100 volts to 6000 volts. Please refer to the A Series data sheet for PCB pin mounting.

#### **APPLICATIONS**

Avalanche Photodiodes Capacitor Charging Electrophoresis Photomultiplier Tubes Piezo Devices Mass Spectrometry

Sustaining Ion Pumps

#### **OPTIONS**

WWW.XPPOWER.COM

1 Watt and 1.5 Watt Versions Available (AG/AGH) Available in 3 Standard Input Voltage Ranges: 0 to 5, 12 or 24VDC (up to 3 kV) Polarity: Choose Positive or Negative Output (P/N) Extended Operating Temperature (AG Models / 1.0W) (T Suffix) Alternate Input / Output Voltages (Consult Factory) See Ordering Information (Page 12)

Complete List of Models on page 2

#### FEATURES

- Proportional Input/Output
- Low Noise Quasi-sinewave Oscillator
- Control Pin (can be used for on/off control)
- Low Leakage Current
- · Low Input/Output Capacitance
- Input to Output Galvanic Isolation
- Short Circuit Protection, 1 Minute Minimum
- No Minimum Load Required<sup>\*2</sup>
- MTBF > 1,862,000 hours, per Bellcore TR 332
- Surface Mount Package
- No external components required
- RoHS Compliant
- UL Recognized

### **AG SERIES**

#### **DETAILED PRODUCT DESCRIPTION**

The AG Series is a new line of ultra-miniature, DC to HV DC converters that set an industry standard in high voltage miniaturization. These component-sized converters are ideal for applications requiring minimal size and weight. Occupying less than one tenth of a cubic inch of volume<sup>15</sup>, this unique package features an extremely low profile of only 0.128 inches (3.25mm) when mounted in from the top, or 0.152 (3.86mm) when mounted in from the bottom of the PCB! The AG Series converter can also mount off the PCB with .030" diameter pins. See page 9 for illustrations. Controllable output voltages range from 100 volts to 6000 volts.

Turn-on voltage is very low at less than 0.7 volts, allowing for wide output voltage operating range. Use of a resonant, quasi-sinewave oscillator and fully shielded transformer result in clean, reliable high voltage conversion with inherently low ripple, EMI/RFI and input ripple current, making this product ideal for integration into noise sensitive equipment.

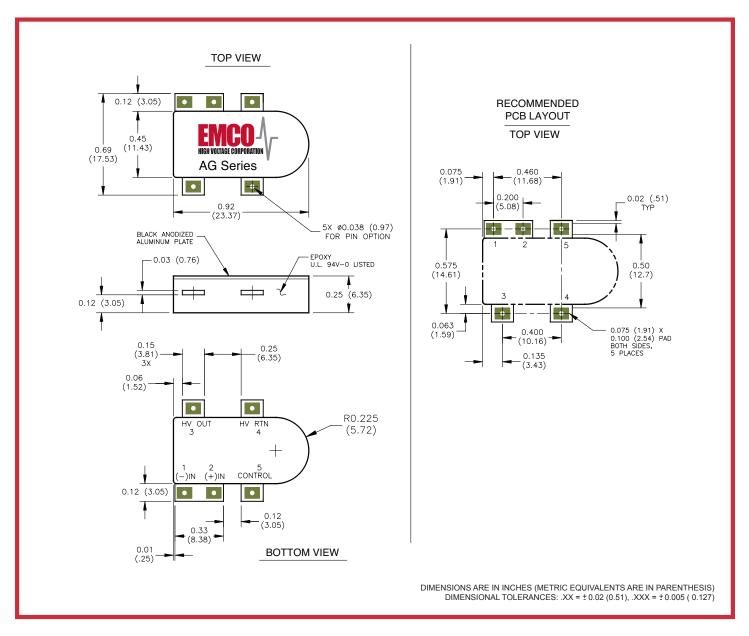

A separate high impedance control pin is standard and is designed for external error amplifier and/or DAC control in closed or open loop systems, or simply connect the control pin to the + input for proportional input to output operation (see performance charts below).

Output power is 1 watt standard, with 1.5 watts available as an option. No minimum load is required. A proprietary vacuum encapsulation process and custom 94V-0 listed, high performance formula are used to achieve excellent high voltage and thermal properties. Isolation is +/- 500V bias on the output return. Input to output leakage current is very low at less than 100 nA and coupling capacitance is also low at <250 pF.

The AG Series leverages XP EMCO's Best-in-Class long-term reliability, utilizing proven DC to high voltage DC conversion technology, perfected by over four decades of high voltage design experience in the most demanding applications. Our extensive in-house capabilities enable us to meet specific customer requirements with standard, modified and custom solutions quickly, easily, and economically. Technical assistance is readily available.

\*Reflow profile is subject to change based on your application

#### **APPLICATION NOTES**

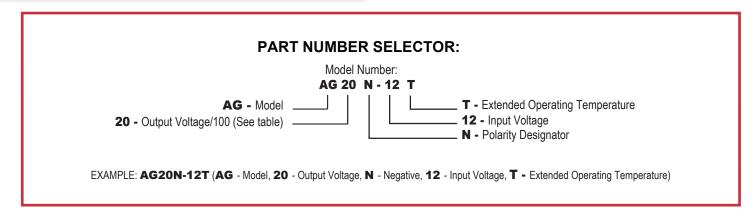

Output Voltage is load dependent. Under light or no-load conditions, reduce the Input Voltage so maximum rated Output Voltage is not exceeded.

|                     | IATION          | ORDER CODE | AVAILABILITY           |
|---------------------|-----------------|------------|------------------------|
| OUTPUT VOLTAGE      | 1 WATT          | AG         | ALL                    |
| OUTPUT VOLIAGE      | 1.5 WATT        | AGH        | ALL                    |
|                     | POSITIVE OUTPUT | Р          | ALL                    |
| POLARITY DESIGNATOR | NEGATIVE OUTPUT | N          | ALL                    |

#### HOW TO ORDER

\*Note:

- 1. At maximum rated output voltage.
- 2. Output Voltage is load dependent. Under light or no-load conditions, reduce the Input Voltage so maximum rated Output Voltage is not exceeded.
- 3. Specifications after 30 minute warm-up, full-load, at 25°C, unless otherwise noted.
- 4. Ripple may be reduced substantially by the addition of an external RC filter.
- 5. Volume will vary depending on package size.
- 6. Proper thermal management techniques are required to maintain safe case temperature at maximum power output.
- 7. The AGH01 is only available in 12V or 24V.
